

Tomato Diseases

Most seed catalogs include codes to indicate whether a tomato variety offers resistance to certain diseases. For help identifying and preventing common tomato afflictions, go to www.MotherEarthNews.com/Tomato-Diseases.

Disease	Codes	Where Disease Is Common
Early blight	EB	Worldwide
Fusarium wilt	F, F1 or FF	Most temperate climates
Late blight	LB	Temperate climates with abundant summer rainfall
Root-knot nematodes	N	Southeast and Southwest
Tobacco mosaic virus	TMV	Worldwide
Tomato spotted wilt virus	TSW or TSWV	Southeast and Southwest
Verticillium wilt	V	Cool northern climates
